PLANNING YOUR PLANT MAINTENANCE FOR SPRING PRODUCTION?

Our expertise in all conveyor chain applications can help you:

- Make improvements to your present chain design
- Eliminate premature chain wear
- Service obsolete and old chain designs

With many years of experience our technical team can support your ongoing needs with all chain applications in grain stores, feed mills and maltings.

Crown Chains have a wide range of conveyor chain types available commonly used in the cereals industry and are available to visit your site if required to identify and where necessary improve existing chain design.

Contact our team on 01845 525511 or email sales@crowncchains.com

Typical chains we can offer include:

- Box scraper chain flights
- Forged link scraper
- Plastic flight
- Twin trace
- Steel pintle
- Welded steel
- Combination scraper
- RB Stirrup
- Sprockets

Make Crown chains your 'go to' team for conveyor chain in feed mills, grain stores and maltings.

If necessary please forward this email to your plant or maintenance engineer.

Call on our extensive stock holding
of fabricated and cast chains.
